abCurate™ Single Channel Pipettes

abCurate™ Pipettes are our newly launched powerful single channel manual air displacement pipettes with high accurate and precise aspiration and dispensing of liquid volumes. Qualified accordingly to ISO 8655/DIN 12650, these reliable pipetting tools offer the following features:

- Smooth and low operating force reduce the risk of RSI (Repetitive Strain injury).
- Presence of lockable adjustment knob to prevent accidental adjustment of set volume during pipetting.
- Clear 4-digit volume display window.
- Compatible with a wide range of pipette tips.
- Fully-Autoclavable at 121°C for 20mins.

abCycler™ PCR Thermal Cycler

The abCycler™ is a thermal cycler intended for nucleic acid amplification through reliable and accurate Polymerase Chain Reaction (PCR). With its precise temperature controls and rapid temperature ramping, it proves to be valuable in different scientific applications, including the vast field of molecular biology, generic analysis, medical and even forensic science. With a built-in software, it operates as a standalone system thus saving space and energy at the same time.

Product Information

Sample Capacity	12 x 0.2ml 8-tube PCR strips / 96 x 0.2ml PCR tubes / 1 PCR plate 8 x 12 (No Skirt, Semi Skirt, Full Skirt)
Thermoblock	Aluminium
Temperature Range	0 – 100°C
Max. heating rate	5.5°C / sec
Max. cooling rate	4.5°C / sec
Gradient Range	1 – 40°C
Gradient block	12 columns
Gradient temperature range	35 – 100°C

abCycler™Q Real-time PCR System

The *abCycler™Q* is a powerful tool used to perform rapid and precise real-time polymerase chain reaction (RT-PCR). The six-channel real-time PCR instrument combines advanced optical technology and precise temperature control to deliver reliable detection for both single and multiplexed real-time PCR assays. The *abCycler™Q* can be used in both research and clinical laboratories for the detection of infectious pathogens genetic diseases and genetic marker.

Product Information

Sample Capacity	12 x 0.2ml 8-tube qPCR strips / 96 x 0.2ml qPCR tubes / 1 qPCR plate 8 x 12 (No Skirt)
Temperature Range	0 – 100°C
Max. heating/cooling rate	Max. heating 6.1°C / sec; Max. cooling 5.0°C / sec
Gradient range	1-40°C
Gradient function	12-column gradient, 35–100°C
Sample dynamic range	1–10 ¹⁰ copies
Scan time	7 seconds for 96 wells for all channels
Fluorescence channels	6 (FAM, HEX/VIC, ROX, Cy5, Texas Red, etc.)
Multiplexing	Up to 5 targets per well
Data analysis modes	Qualitative, Absolute/Relative quantification, Genotyping, Melt curve analysis, etc.
